

The Immersive LearningScape Survey

Last month, we presented at the Council of Educational Facility Planners International (CEFPI) Annual World Conference. Our presentation explored how, in an increasingly flattened world, a focus on providing an outstanding 21st century education will be the differentiator in how we compete at a global scale. As a significant part of our research, we created a survey to help us understand the public myths, realities and perceptions of our current educational model and where we need to be in the future.

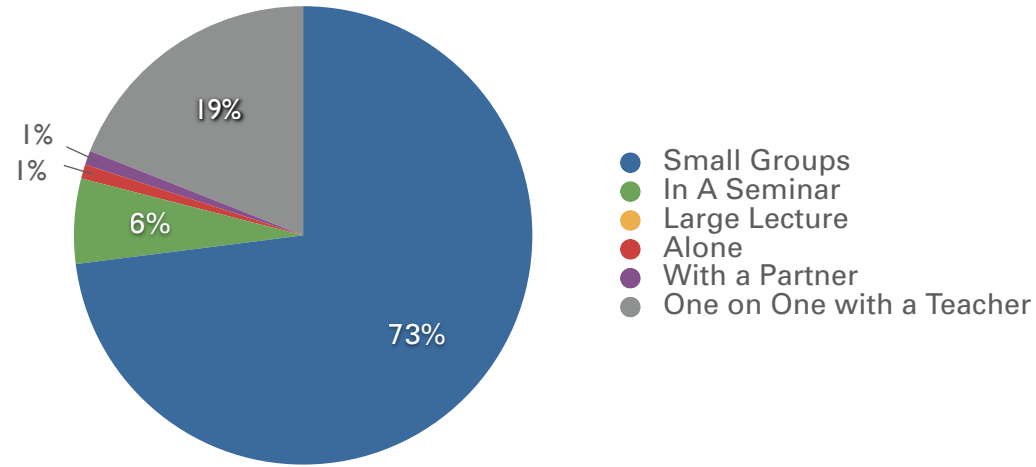

Our survey included students, teachers, parents, school administrators and other concerned citizens. We appreciate everyone who took the time to participate. We'd like to share the quantitative results.

01 Which of the following best currently describes you:

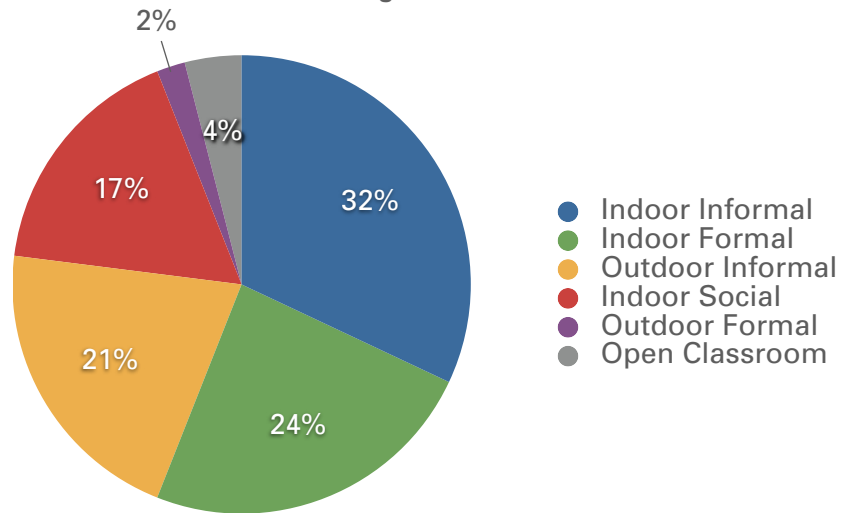

The Immersive LearningScape Survey

02 How is learning best achieved?

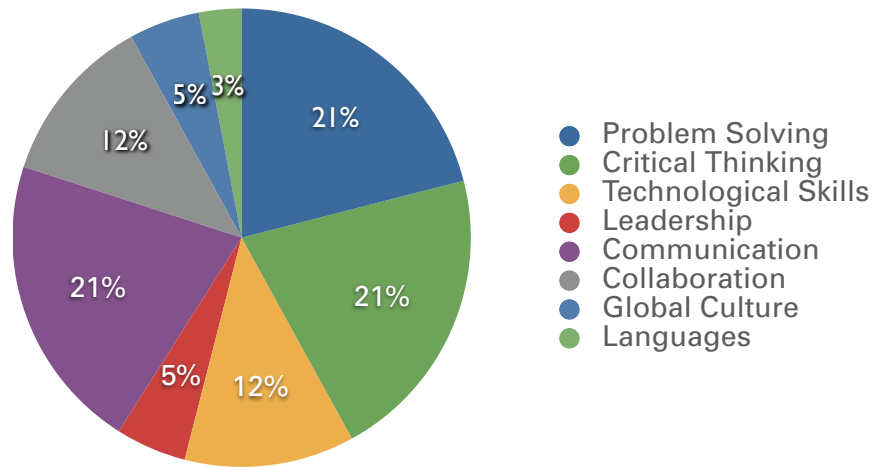

03 What type of environment is most conducive to learning?

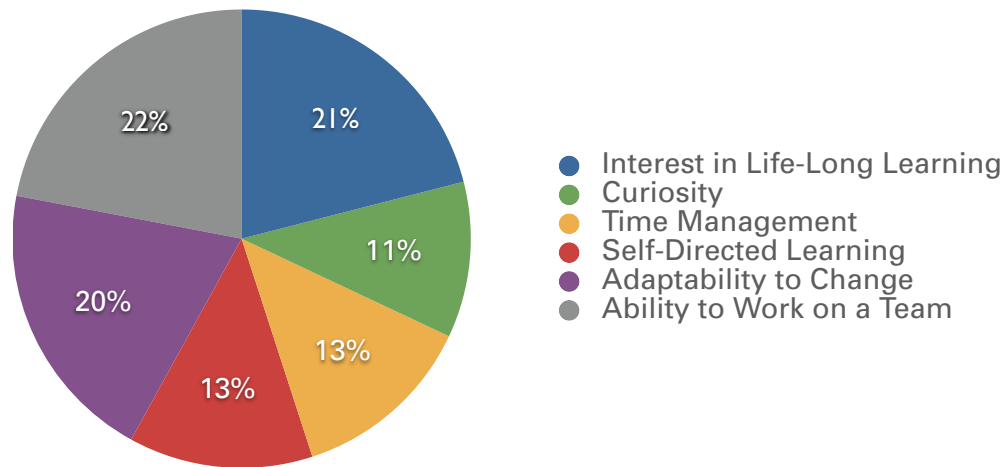

The Immersive LearningScape Survey

04 What skills are most important for the upcoming generation to master?

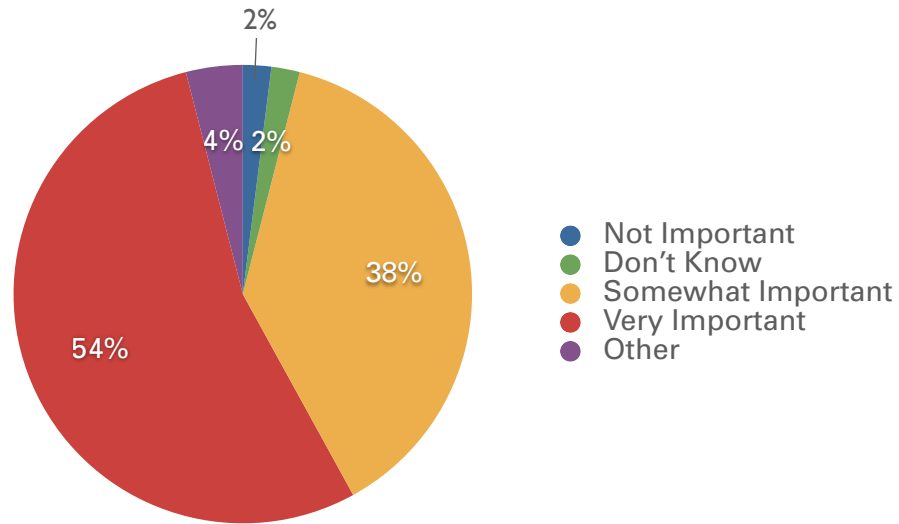

05 What skills are most important for teachers to instill in students?

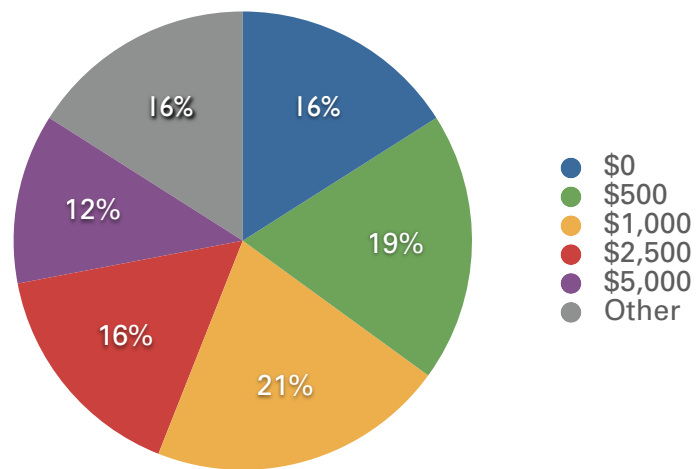

The Immersive LearningScape Survey

06 How important is it to customize education to cater to individual student needs?

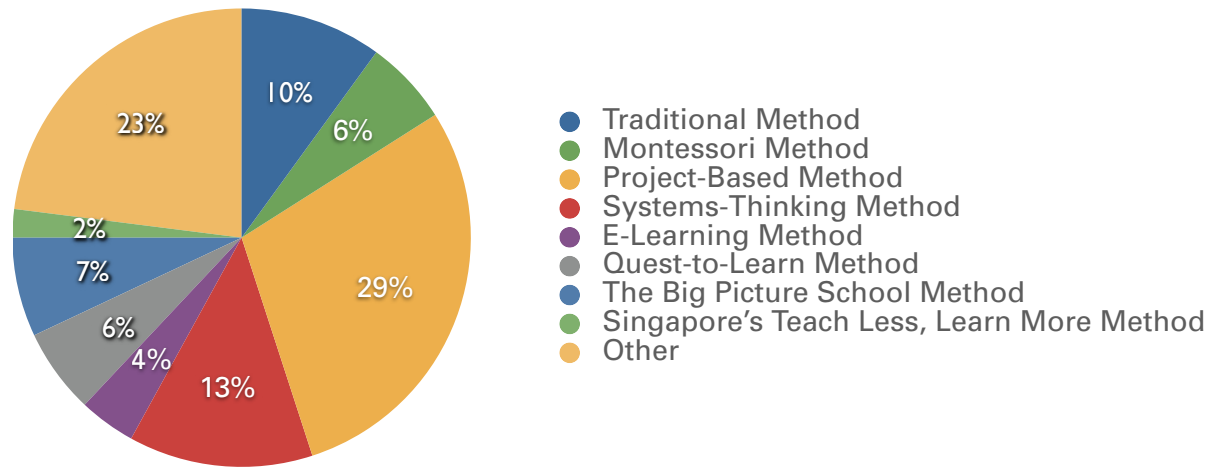

07 How much additional money would you be willing to pay annually to improve our education system?

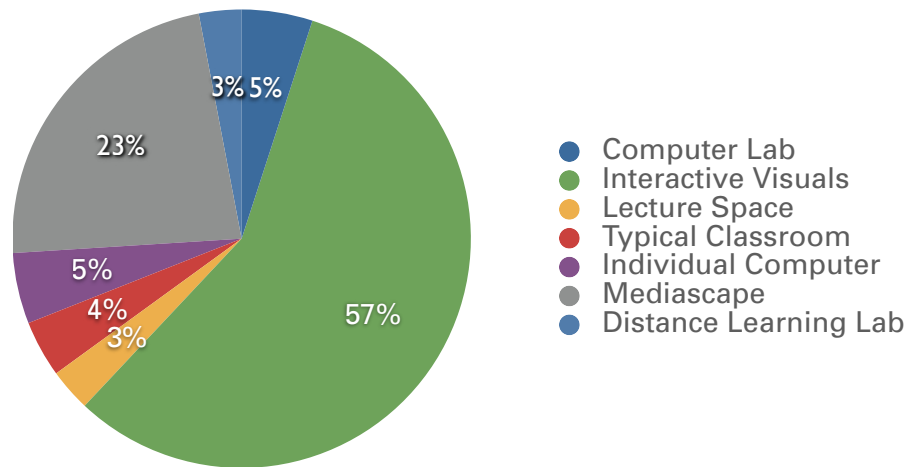

The Immersive LearningScape Survey

08 Which learning methodology will best provide students with the skills they'll need to be competitive in the 21st century?

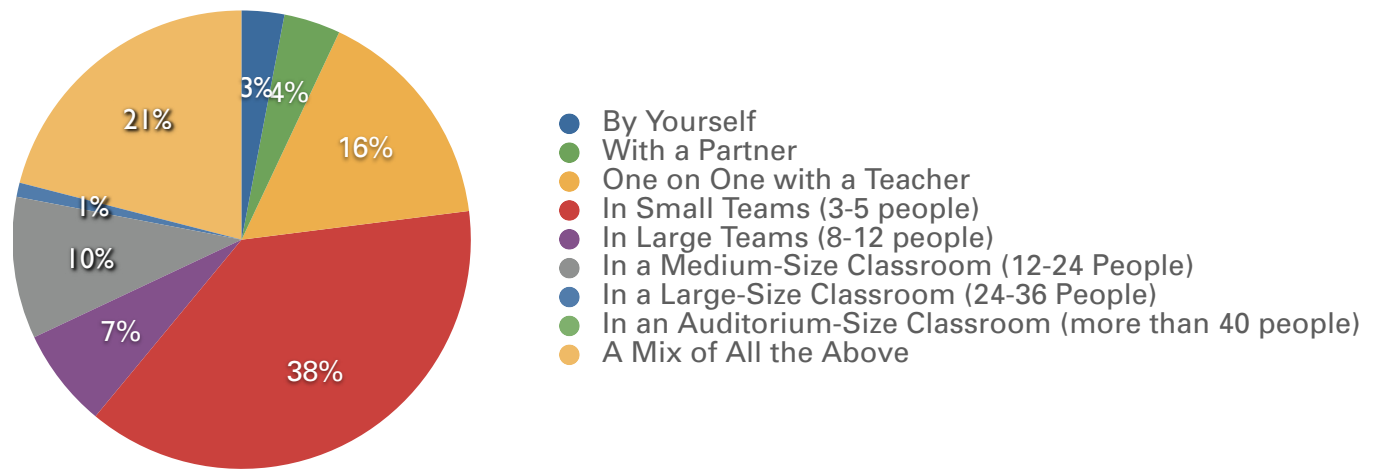

09 Learning in the 21st century is both physical and virtual. Which setting best accommodates these types of learning?

The Immersive LearningScape Survey

10 What if students could choose how they wanted to learn each day. Which level of interaction best supports learning throughout the day?

11 Which of the following resources has the most impact on the state of today's education?
